

# INDUSTRIAL INTERNSHIP

## WEEKLY PERFORMANCE REPORT (WPR)

Student Name : Aravind G

Head-Coordinator Name : Shailza Bansal

Organization : Cureya

Hours Worked : Monday 1 HRS, Tuesday 2 HRS

Wednesday 2.5 HRS, Thursday 2.5 HRS, Friday 2 HRS,  
Saturday TO BE CONTINUED.

On the first day of my internship, I learned about the essential skills that a programmer should have, as well as an overview of Artificial Intelligence, Machine Learning, Deep Learning, and Data Science.

On the second day, I learned how AI became so powerful and why it is so important.

Following that, in-depth details about Machine Learning and its techniques were furnished.

In addition to that, I've learned about some of the most important ML algorithms.

On the third day of my internship, I was well taught on the limitations of Machine Learning.

Also a detailed information about Deep Learning and how it works, as well as demonstrations of some of the Deep Learning algorithms.

Aside from that, I learned about Neural Networks and Natural Language Processing.

I learned about anaconda and jupyter notebooks on the fourth day.

Aside from that, the fundamentals of Python were taught.

On the fifth day, I learned about Machine Learning and its application.

I also learned about various Machine Learning algorithms and approaches, and I ended up by reading some in-depth Machine Learning notes.
